

## Did you know that 2 out of 3 people with diabetes die from heart disease or stroke?

Ask about the link between diabetes and heart disease and learn how the **ABCs** of diabetes can help you lower your risk:

- **A**: Lower your **A**1C, a test that measures average blood sugar over the past 3 months, to less than 7.
- **B**: Keep your **B**lood pressure below 130/80.
- C: Get your "bad" Cholesterol (LDL) below 100.

For free information about how to manage your diabetes, call the Arizona Department of Health Services at 1-888-542-1886.
